

1   **WHAT IS CLAIMED IS:**

2           1. A gearshift knob adapted to mount a gearshift column connected with  
3   a gearbox of a vehicle, and comprising:

4           a body having a top, a grip, a bottom and a bottom hole formed in the  
5   bottom to mount the gearshift column; and

6           a solid pattern formed on the body and protruded from the body.

7           2. The gearshift knob as claimed in claim 1 further comprising a  
8   covering ring attached to the bottom of the body.

9           3. The gearshift knob as claimed in claim 2, wherein the top of the body  
10   is enlarged and the solid pattern is formed on the enlarged top and extends  
11   toward the bottom of the body.

12          4. The gearshift knob as claimed in claim 2, wherein the solid pattern is  
13   formed on the grip of the body.
